

INSURANCE FLOWCHART FOR SMALL IT BUSINESSES

Regardless of size or specialty, all IT businesses benefit from **General Liability Insurance** and **Professional Liability Insurance** (aka Errors & Omissions). It's also a good idea to have some basic Property coverage to protect your equipment and office space. A **Business Owner's Policy** (BOP) often provides enough General Liability and Property coverage for small technology businesses. Beyond that, your coverage needs depend on the work you do.

Follow this flowchart to get an idea of which types of insurance might protect your business.

The Insurance Flowchart for IT Professionals is meant solely as an educational tool. For a more accurate idea of which insurance policies can protect your business, complete an application at insureon.com.
